PROJECTS

Hikr: [App](#) | [GitHub](#) (Collaborative Project) July 2019

Tech used: Python, Django, Jinja, CSS, JS

Hikr is a web app created so a user can track their hikes by creating a post with a picture and description. To incorporate a social component and add functional complexity, we enabled users to create comments and view other profiles.

Fieldr: [App](#) | [GitHub](#) (Collaborative Project) July 2019

Tech used: Node, Express, Mongoose, JS, jQuery, CSS

Fieldr is a web app designed to help users schedule activities by creating a post with a date, time, location. Users can join an activity by clicking the "join" button and they can also comment on the post.

OPEN SOURCE CONTRIBUTION

Techqueria: [Website](#) | [GitHub](#)

Techqueria is a 501c3 nonprofit serving the largest community for Latinx in Tech.

- Contributed to their open source website by adding events and new features.
